PROJECTS

PROJECT - 1
NetflixGPT
(HTML, CSS, Java Script, React, Redux, Firebase)

- Developed a Netflix-like application using React, integrating Firebase for authentication and Redux for state management.
- Implemented TMDB API for fetching movie data and OpenAI's GPT for intelligent movie recommendations.
- Configured Tailwind CSS for responsive design, ensuring a seamless user experience across devices.
- Built custom hooks, sign-in/sign-up forms with validation, and deployed the app to production.
- Resolved critical bugs, optimized performance, and ensured the app's scalability.

PROJECT - 2
Thunder-H Social Media
(HTML, CSS, Java Script, React, Redux, Firebase)

- Created "Thunder-H Social Media," a LinkedIn clone, employing React Redux, and Firebase.
- Implemented user authentication, including login, signup, and logout functionalities.
- Developed profile creation features to enhance user experience and interaction.
- Incorporated a news feed feature to simulate the LinkedIn experience within the application.
- Emphasized seamless navigation and user interaction, prioritizing a polished interface similar to LinkedIn.
